8.2.	3 Application of Rates and Charges	(X)
A.	PAL rates and charges are as for one-party business main telephone exchange service in the exchange of connection. In addition, a monthly rate for intrastate directory assistance service also applies.	
В.	For business customers with two or more PAL service lines, regulations as specified in Section 5.1.4D apply.	
C.	Local usage is charged for as specified in Section 5 for the exchange of connection.	
D.	Charges for directory assistance service and for MTS apply to calls originated from PAL.	
E.	Local service calls placed to a telephone relay service are provided without charge.	
1.		1
F.	A PAL credit will apply to a PAL under the following conditions.	
1.	To qualify for the PAL credit, each COCOT provider must be certified by the Massachusetts D.P.U. The PAL must be connected to a COCOT telephone reasonably accessible to the customers or patrons of the location owner or to the general public, and used primarily for the purpose of vending payphone service to such end users. The location of each PAL must conform to any commission rules or regulations pertinent to certification.	
2.	The certified PAL is eligible for credit when the amount billed for telephone service during a billing period, including the charges for the PAL service line, touch tone, Curb A Charge service, directory assistance, sent-paid local and intraLATA toll usage, plus non sent-paid local and intraLATA toll usage during an associated calendar month exceeds \$75.00.	
3.	The credit amount is a fixed percentage of the amount billed for the PAL service line, touch tone, Curb A Charge service, sent-paid local and intraLATA toll usage, non sent-paid local and intraLATA toll usage, and directory assistance charges. Taxes, the End User Common Line charge and any charges for services provided under any other tariffs are excluded from the calculation of the credit.	
G.	The furnishing of PAL facilities is subject to the regulations for construction as specified in Section 2. In addition, when facilities are furnished to a location other than a customer premises, charges based on full cost of the installation apply.

(New PAL Services Can Be Found On Pages 2 Through 5 And Page 29)

8.1 Public Access Smartline (PASL) Service

(N)

8.1.1 Definitions

Dial Tone First—Enables end users to dial certain calls without requiring coin deposits, (e.g. Universal Emergency Number service).

Originating Number Screening-Operator Screening-Alerts the operator that operator handled calls and operator handled directory assistance calls may not be billed to the originating number. Calls may be placed on a calling card, collect or charge to a third number basis.

Terminating Number Screening-Alerts operators throughout the country that collect and third number calls cannot be billed to a particular number.

Selective Blocking-Blocks calls to a number with a 900 area code.

8.1.2 Description

- A. PASL is a class of main telephone exchange service offered to payphone providers for use by the general public. This service is available in suitably equipped central offices where sufficient facilities exist.
- B. In the Hampton exchange, where measured PASL service is unavailable, unlimited PASL service may be provided. When measured PASL service becomes available, all unlimited PASL service will be automatically converted to measured PASL service.

8.1.3 Responsibility of the Payphone Provider

- A. Payphone providers that subscribe to PASL are subject to all tariff regulations which apply to customers with one-party business exchange service including those for resale and sharing.
- B. The payphone provider is responsible for all rates and charges originating from or accepted at this service.
- C. All payphones must have posted notice of telephone numbers, ownership, rates repair reporting numbers, and operational instructions for local and toll calling.

(N)

8.1.4 **Service Components** (N) BCAL-1 and BCAL-2 are comprised of a network access line with dial tone first capability, coin functionalities and blocking features. The network access line is measured and BCAL-1 is arranged for one way (outgo-1. ng) calling and BCAL-2 is arranged for two way (incoming and outgoing) calling 2. The coin functionality features consist of coin timing and rating of sent paid end user calls and coin signaling. Coin signaling is used to control the disposition of the zoins held in the pay telephone and consists of coin collect and coin return. Coin collect is used when a call has been completed and coin return is used if a no answer or busy condition is encountered. 3. The blocking features consist of originating number screening-operator screening, terminating number screening and selective blocking. В. **Inmate** is comprised of a network access line and blocking features. The network access line is measured, arranged for one way (outgoing) calling and provides for originating collect calls only to areas within the North American Dialing Plan. The North American Dialing Plan consists of the continental United States, Alaska, Hawaii, Canada, those parts of Mexico in the 903 Area Code, Bermuda, Puerto Rico, the Virgin Islands, and other Caribbean Islands in the 809 Area Code. The blocking features consist of originating number screening-operator screening and terminating number screening. End users do not have access to Directory Assistance service. C. Charge-A-Call is comprised of a network access line and blocking features. The network access line is measured, arranged for one way (outgoing) calling anc provides for collect, charge to third telephone number, or charge to calling card call!

8.1.	5 Coin Timing and Rating—PASL Payphone User	(N)
Ā.	Local Service-Payphone-user local service usage is timed, rated and billed on a message unit basis.	
1.	For message units the initial period is five minutes. Each overtime period is three minutes for which one message unit applies. The minimum initial period per local service message is two message units. Rates apply to each period or fraction thereof.	
В.	For rates and regulations for local messages on a collect, bill to a third telephone number, or charge to a calling card within an exchange, between exchanges, or between exchanges and localities in the local service area of the exchange, refer to Section 5.	
C.	Message Telecommunication Service (MTS) timing, and rating applies for messages to exchanges or localities not included in the message unit area.	
D.	MTS calls from PASL payphones are timed and rated as described in Section 9.	
E.	Local service calls placed to a telephone relay service are provided without charge.	
1		" (N)

Issued: December 31, 1996

Effective: January 30, 1997

M. J. McCluskey Vice President - New Hampshire

To be implemented on April 1, 1997.

8.1.	6 Application of Rates and Charge	(N)
A.	The PASL rate includes the one-party business measured service-4E main telephone exchange service rate for the applicable rate group determined by the exchange of connection including the local usage allowance. In addition, the monthly E911 surcharge and monthly charge for intrastate Directory Assistance (DA) service based on average statewide DA usage in excess of the DA call allowance for one-party business service also apply to PASL service. The DA surcharge does not apply to PASL-Inmate service.	
В.	Local usage is charged for as specified in Section 5 for the exchange of connection.	
C.	Message Telecommunications Service (MTS) is charged for as specified in Section 9.	
D.	When measured PASL service becomes available in the Hampton exchange, all unlimited PASL service will be automatically converted to measured PASL service without charge.	
E.	Local service calls placed to a telephone relay service are provided without charge.	(N)

8.2 Public Access Line (PAL) Service

(X)

8.2.	1 Description
A.	PAL which is for use with customer owned coin and coinless pay telephones is a class of main telephone exchange service offered to business customers for use by the general public or the combined use of the customer and his patrons.
В.	PAL is provided from the Telephone Company's central office up to and including the network interface located at the customer's premises or other customer arranged location and is provided only where suitable central office facilities are available.
C.	Curb A Charge which provides originating number screening and terminating number screening may be provided at rates and charges specified in Section 7.
1.	Directly dialed screening is not available with PAL service.

Regulations 8.2.2 Customers with PAL are subject to all tariff regulations which apply to customers with one-party measured business service including those for resale and sharing set forth by the Public Utilities Commission. B. The customer is responsible for all rates and charges originating from or accepted at this service. A telephone number change may be required if a customer changes from PASL service to PAL. D. Telephone equipment used with PAL must be registered in compliance with Part 68 of the FCCs Registration Program. E. All customer owned pay telephones must have posted notices of telephone number, ownership, rates, repair reporting numbers, and operational instructions for local and toll calling.

(C)

(X)

(X)

8.2.3	Application of Rates and Charges
1 .	AL rates and charges are as for one-party business measured service-4E main telephone exchange service in the exchange of connection including the associated loal usage allowance, the monthly E911 surcharge and an additional monthly charge or intrastate Directory Assistance (DA) service based on average statewide DA usage in excess of the DA call allowance for one-party business service. In addition, monthly rate for intrastate DA service also applies.
E-	or business customers with two or more PAL service lines, regulations as specified n Section 5.1.5A apply
Ľ.	Additional local usage is charged for as specified in Section 5 for the exchange of connection.
D.	Charges for MTS apply to calls originated from PAL.
Е.	Local service calls placed to a telephone relay service are provided without charge.
F.	4 PAL credit will apply to a PAL under the following conditions.
1.	The PAL credit applies only to a coin or coinless pay telephone connected to measured service-4E PAL service and only if the pay telephone provider is certified by the Public Utilities Commission. The PAL must be connected to a telephone reasonably accessible to the customers or patrons of the location owner or to the general public, and used primarily for the purpose of vending payphone service to such end users. The location of each PAL must conform to any commission rules or regulations pertinent to certification.
2.	The certified PAL is eligible for credit when the amount billed for telephone service during a billing period, including the charges for the PAL service line, Curb A Charge service, sent-paid local and intraLATA toll usage, plus non sent-paid local and intraLATA toll usage during an associated calendar month exceeds \$80.00.
3.	The credit amount is a fixed percentage of the amount billed for the PAL service line, Curb A Charge service, sent-paid local and intraLATA toll usage, and non sent paid local and intraLATA toll usage. Taxes, the End User Common Line charge and any charges for services provided under any other tariffs are excluded from the cal culation of the credit.
G.	The furnishing of PAL facilities is subject to the regulations for construction as spe cified in Section 2. In addition, when facilities are furnished to a location other than a customer premises, charges based on full cost of the installation apply
